EXAMPLE

Child Information:

Name: RONNIE TARGET	Age: 12	MiSACWIS Person ID: 5555555
Current Legal Status: TCW	Date Child Entered Care: 7/11/2019	Current Placement: Foster Home (Adobe)
Referring Agency: AGENCY NAME	Referring Worker: SALLY WORKER	Date of Last Trauma Assessment (attach): 10/1/2019

Reason for Request:

(include current treatment needs and recommendations, summary of community-based services provided prior to request, number of placements, and type of residential requested)

EXAMPLE:

Ronnie is placed in the Adobe family home. This is his third foster home placement in the last three months. Ronnie exhibits sexualized behaviors and poor boundaries, and the Adobe family has had to place alarms on all bedroom doors as a safety measure for the other children placed in the home. Ronnie has an extensive trauma history that manifests itself in behaviors such as tantrums, physical and verbal aggression toward adults and children, and destruction of property. Most recently, Ronnie was found to be torturing the Adobe family's dog with a heavy object, and when confronted, Ronnie broke three windows and put a dent in Mr. Adobe's car. This led to the Adobe family requesting his removal from the home in 30 days. The Adobe family is willing to consider taking placement of Ronnie again after Ronnie receives treatment related to the above concerns.

Ronnie has had EFC level three services in place since being placed at the Adobe home. These services are complimented by TFCBT therapy once per week, wraparound services, and occupational therapy services twice per week.

Due to the severity of Ronnie's needs and ongoing placement stability, the agency is requesting residential at this time, specifically a Mental Health Behavior Stabilization program, where his medication can be monitored and physical and mental safety supported.

Summary of placement efforts:

(attach genogram and 4606)

EXAMPLE:

As noted above, this is Ronnie's third foster home placement in three months. As noted in the attached 4606, the agency contacted Ronnie's aunt and uncle again regarding placement, but they feel they are unable to meet Ronnie's needs at this time. The agency also contacted other foster homes, but at this time feels that residential is in Ronnie's best interest. As noted in the attached genogram, no relatives are interested or willing to take placement of Ronnie at this time.

Expected timeframe for residential:

EXAMPLE:

The agency would like Ronnie to obtain consistency and structure, while developing coping skills and learning appropriate social cues and boundaries. The expected timeframe for residential is six to nine months. It should be noted that the Adobe family is open to placement again after residential treatment, and plans to maintain contact and participate in family therapy with Ronnie during residential placement.

Agency's plan to achieve permanency:

EXAMPLE:

As noted above, the Adobe family is open to placement again after residential treatment, and plans to maintain contact with Ronnie during residential placement. As a TCW with a goal of reunification, the agency will work with the biological family to continue visits during Ronnie's placement in residential, as well as the possibility of family therapy.
